3D geolocation make it better (let's use it deeper ...)

- ✓ GI data/services/systems integration with near/far techs: BIM, GPS, photogrammetry, oblique imagery, lidar, radar, georadar, echo sounder, side scan sonar, 3D laser scan, audio/video/sensor feeds, 3D computer graphics, ...
- ✓ LOD & tiling optimized network streaming technologies
- ✓ outdoor / indoor continuos navigation
- ✓ seamless vertical data investigation (... air/land/sea/under...)
- ✓ 4D analysis of time series & real time world simulation
- ✓ easy understanding (even to non technical / common people)
- ✓ shared participation and urban planning
